PROFESSIONAL SUMMARY

Software and AI/ML Engineer with hands-on experience building Machine Learning, Generative AI, and Computer Vision applications. Experienced in Python development, model training and evaluation, LLM-based applications, Retrieval-Augmented Generation (RAG), and backend development using Django and FastAPI. Interested in building reliable AI systems by combining model development, application engineering, and practical problem-solving.

PROFESSIONAL EXPERIENCE

Software Engineer - Python & AI/ML

Apr 2025 - Oct 2025

Sigma Solve Inc., Ahmedabad · Full-time

- Designed, developed, and deployed **7 AI-powered systems** across Generative AI, LLM applications, Machine Learning, and Computer Vision, taking solutions from development through integration and deployment.
- Built RAG pipelines and LLM-powered applications using LangChain, LangGraph, and LlamaIndex, integrating retrieval, prompt engineering, tool calling, and agent-based workflows for context-aware responses and multi-step task execution.
- Worked on model training, evaluation, and fine-tuning across Machine Learning, Deep Learning, and NLP, using TensorFlow, PyTorch, scikit-learn, BERT, and DistilBERT for task-specific applications.
- Developed real-time Computer Vision applications using YOLO and OpenCV, covering image and video processing, detection, and segmentation workflows; also explored generative video and AI avatar and motion-generation technologies.
- Built backend services and asynchronous task-processing workflows using Django, FastAPI, Celery, Celery Beat, Docker, and RabbitMQ, with GitLab CI/CD supporting application delivery and deployment.
- Integrated external platforms and business systems, including Salesforce using SOQL and JWT authentication, Shopify, and Odoo through APIs; implemented automated data collection workflows using Crawlee.
- Processed and managed application data using Pandas, NumPy, SQL, PostgreSQL, and MongoDB, while maintaining version control with Git and collaborating through Agile development practices.

Python Developer (Trainee)

Jan 2025 - Apr 2025

Sigma Solve Inc., Ahmedabad

- Built a Yoga Correction System using Django and computer vision under senior guidance.
- Delivered real-time pose recognition and feedback across multiple yoga poses.

Odoo Intern

May 2023 - Aug 2023

BeyondData Solutions Pvt. Ltd., Ahmedabad

- Developed and customized Odoo modules using Python for ERP solutions.
- Assisted in backend development, data handling and system configuration.

PROJECTS

- **Deskmate (Python, FastAPI, Multi-agent, RAG, Docker)**: Team of AI agents in a 3D office where a head agent plans and delegates to specialists in parallel; answers from documents and databases with cited sources, on free-tier LLMs with automatic provider fallbacks.
- **EvalKit (Python, LLM-as-judge, CI)**: Test suite for AI apps that scores answers with rules or an LLM judge, compares runs with a statistical test, and blocks bad changes through a CI quality gate.
- **MoodyTunes (Python, Django)**: Music platform with webcam and text-based mood detection, collaborative playlists, mood analytics, and full Spotify integration for search, import and playback.
- **Yoga Correction System (Python, Django, FastAPI, MediaPipe)**: Pose correction combining a Django app with a FastAPI real-time service, using MediaPipe landmarks and a trained model for angle-based feedback from a photo or live webcam.
- **Drowsiness Detection (Python, FastAPI, MediaPipe)**: Real-time drowsiness and yawn detection via webcam, using MediaPipe face tracking with a live dashboard and escalating alerts.
- **PaperGraph (Python, FastAPI, LLM, D3.js)**: Turns research papers into a queryable knowledge graph, extracting concept relationships with an LLM and answering questions over the graph.
- **Browser Automation Agent (Python, LangGraph, Playwright)**: Multi-agent LangGraph workflow that turns a plain-English goal into web research, browsing with Playwright and extracting structured data via an LLM.
- **Library Management System (Python, Odoo)**: Customized Odoo modules for cataloging and borrowing workflows.

TECHNICAL SKILLS

Generative AI & LLMs: LangChain, LangGraph, LangServe, LlamaIndex, RAG, Prompt Engineering, Azure OpenAI, Fine-tuning

AI Agents & Workflows: AI Agent Development, Multi-Agent Systems, Tool Calling, Agentic Workflows, Workflow Orchestration

Machine Learning & Computer Vision: TensorFlow, PyTorch, scikit-learn, XGBoost, LightGBM, OpenCV, MediaPipe, DeepFace, Image Segmentation, Real-time Video Processing, NLP, Model Training & Evaluation

Backend & APIs: Django, FastAPI, REST APIs, Celery, Celery Beat

Data & Databases: Pandas, NumPy, Seaborn, Matplotlib, SQL, PostgreSQL, MongoDB

Infrastructure & CI/CD: Git, GitLab CI/CD, Docker, RabbitMQ

Integrations & Automation: Salesforce, Odoo, Crawlee, Playwright, Web Scraping

Soft Skills: Communication, Problem Solving, Time Management, Teamwork

EDUCATION

B.Tech, CSE Specialized in Big Data Analytics 2022 - 2025

Ganpat University, Ahmedabad · CGPA 8.22
