PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on production experience across Generative AI and Computer Vision — RAG pipelines, LLM fine-tuning on Azure OpenAI, and real-time vision systems. Shipped seven applied AI systems end-to-end at Sigma Solve, from model to backend (Django/FastAPI) to CI/CD. Focused on understanding a problem properly before reaching for a framework.

PROFESSIONAL EXPERIENCE

Software Engineer — Python & AI/ML

Apr 2025 – Present

Sigma Solve Inc., Ahmedabad · Full-time

- Designed and built end-to-end ML, LLM and Computer Vision pipelines — RAG systems, LLMs fine-tuned on Azure OpenAI, and real-time vision models — taken to production.
- Built backend services with Django and Celery/Celery Beat, shipped through multi-stage GitLab CI/CD.
- Optimized a Salesforce integration (SOQL, JWT auth), replacing repeated per-record queries with a single bulk query.
- Delivered seven applied AI systems spanning NLP, generative video, computer vision and automation, including:
 - Trained DistilBERT for email prioritization, with automated colour-coded flagging in the email client.
 - Built a race-video analysis pipeline from scratch — YOLO segmentation, event detection, multi-frame overtake tracking.
 - Built real-time bi-directional Shopify ↔ Odoo sync for products, orders, inventory and customers.
 - Fine-tuned an LLM on sales-call logs for role classification, with automation to catch new edge cases.

Python Developer (Trainee)

Jan 2025 – Apr 2025

Sigma Solve Inc., Ahmedabad

- Built a Yoga Correction System using Django and computer vision under senior guidance.
- Delivered real-time pose recognition and feedback across multiple yoga poses.

Odoo Intern

May 2023 – Aug 2023

BeyondData Solutions Pvt. Ltd., Ahmedabad

- Developed and customized Odoo modules using Python for ERP solutions.
- Assisted in backend development, data handling and system configuration.

PROJECTS

- **MoodyTunes** (Python/Django) — webcam-based real-time emotion detection with mood-matched song suggestions.
- **Yoga Correction System** (Python/OpenCV) — real-time recognition and correction of 35 poses, with live speech guidance.
- **Library Management System** (Python/Odoo) — customized Odoo modules for cataloging and borrowing workflows.
- **RTO Monitoring System** (Java/MySQL) — secure document tracking system with login and record-keeping for an RTO office.

TECHNICAL SKILLS

Generative AI / LLMs: LangChain, LangGraph, LangServe, LlamaIndex, RAG, Prompt Engineering, Azure OpenAI, Fine-tuning

Machine Learning / Computer Vision: TensorFlow, PyTorch, OpenCV, Image Segmentation, Real-time Video, NLP, Model Training & Evaluation

Backend & APIs: Django, FastAPI, REST APIs, Celery & Celery Beat

Data: Pandas, NumPy, Seaborn, Matplotlib, SQL, PostgreSQL, MongoDB

Infrastructure: GitLab CI/CD, Docker, RabbitMQ, Git

Integrations & Automation: Salesforce (SOQL, JWT), Odoo, Crawlee, Web Scraping

Soft Skills: Communication, Problem Solving, Time Management, Teamwork

EDUCATION

B.Tech, Information & Communication Technology

2022 – 2025

Ganpat University, Ahmedabad · CGPA 8.22
